

# Voting System Pricing

October 2023

The hardware needed for a polling place is one VxScan (**\$6,000**) and one VxAdmin laptop (**\$1,000**), totaling **\$7,000**. Annual maintenance and software upgrades are part of a **\$500 per year subscription**.

We recommend one VxScan per 3,000 voters and one VxAdmin per polling location.

## Hardware Price List

Component	Unit Price
VxScan	\$6,000
VxAdmin	\$1,000
Laser Printer ( <u>optional</u> )	\$500

Each VxScan includes a collapsible ballot box and battery backup. Each VxAdmin includes authentication smartcards. Consumables such as USB drives, printer paper, and tamper evident seals are available from several COTS suppliers. The optional laser printer is for printing cumulative tally reports from VxAdmin.

## Election Programming

VotingWorks offers full-service: we design your ballot and program your USB sticks and authentication smartcards for **\$500/election**. We print ballots with Robert Evans Printing in Bow, NH: printing and shipping 5,000 ballots costs **\$2500**.
