VotingWorks

Voting System Pricing

October 2023

The hardware needed for a polling place is one VxScan (**$6,000**) and one VxAdmin laptop (**$1,000**), totaling **$7,000**. Annual maintenance and software upgrades cost **$500 per year**.

We recommend the same number of VxScans as the number of Accuvotes you've used successfully. We recommend one VxAdmin per polling location.

Hardware Price List

Component	Unit Price
VxScan	$6,000
VxAdmin	$1,000
Laser Printer (optional)	$500

Each VxScan includes a collapsible ballot box and battery backup. Each VxAdmin includes authentication smartcards. Consumables such as USB drives, printer paper, and tamper evident seals are available from several office and elections supply vendors. The optional laser printer allows for printing cumulative tally reports directly from VxAdmin.

Election Programming

VotingWorks offers full-service: we design your ballot and program your USB drives and authentication smartcards for **$500/election**.
